Election/Restrictions

An amendment of 7/28/05 amended claims 6-10, 13, 17-19, 30, 32-34, and added new claims 35-42.

Claims in the application are 6-42.

5 Claims 20-29 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 7/20/04.

10 Restriction to one of the following inventions is required under 35 U.S.C. 121:

- 15 I. Claims 6-19, 30-36 and 42 drawn to a material having available at the surface thereof, a catalytic agent having nitraite reductase or nitrosothiol reductase activity, and a medical device containing the material, classified in class 424, subclass 94.4.
- II. Claims 37-40, drawn to a complex comprising a metal-N_x-donor macrocyclic ligand or a metal-S_x-donor macrocyclic ligand, classified in class 435, subclass 183.
- 20 III. Claim 41, drawn to a complex of Cu(II) and a ligand binding the Cu(II) that is a specific dibenzo compound and salts thereof, classified in class 514, subclass 183.

The inventions are distinct, each from the other because:

Inventions I-III are distinct since each can be performed in the absence of the other due to a different element or feature required.

25 Invention I does not require a complex having a metal-N_x-donor

Art Unit: 1651

macrocyclic ligand or a metal-S_x-donor macrocyclic ligand as required by invention II and a complex as in III that is not required to have catalytic activity. Inventions II and III do not require a material having at a surface a catalytic agent or a catalytic surface and a
5 medical device containing the material as required by invention I. Inventions II and III require different complexes. Examining inventions I-III together will be a serious burden due to the differences in the inventions.

Because these inventions are distinct for the reasons given above
10 and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even
15 though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the
20 application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
